POSTER · UNITS IV AND V

Flying legally in India

Drone Rules 2021 (as amended): category, registration, pilot, zone

1. Which category?

Nano	Micro	Small	Medium	Large
≤ 250 g	250 g – 2 kg	2 – 25 kg	25 – 150 kg	> 150 kg

2. Paperwork

UIN	Unique Identification Number for each drone, on Digital Sky
Type certificate	For the drone model, with exemptions (e.g. nano, models for R&D)
RPC	Remote Pilot Certificate from a DGCA-authorized RPTO; not needed for nano, or micro flown non-commercially

3. Which zone? Check the Digital Sky airspace map

GREEN	No permission needed, up to 400 ft (about 120 m) AGL
YELLOW	Controlled airspace: permission from the air traffic control authority
RED	No-drone zone: only with Central Government permission

Exam trap: US Part 107 rules (400 ft, VLOS, waivers) are not Indian law. Quote the Drone Rules 2021 for India.

Always: zones and amendments change. Check the current Digital Sky map and DGCA notices before each flight.
